NAILVERSE

Not just NAILS.. IT's the WHOLE MOOD

Online Nail Art & Nail Beauty Online Platform

WEEK - 7

---

7. SQL Query Implementation for Nailverse Database

Scenario

By now Nailverse holds data about its customers, services, appointments, payments, reviews and product stock. The management team needs to pull useful facts out of this data every day: which services are priced highest, which customers booked recently, how many slots are left, and how many appointments are still pending.

In this week the data is not changed much. Instead, SQL queries are written to search, filter, sort and summarise the information already stored in the Nailverse database, and a few simple business reports are produced from it.

Preparing the Data

Two records are added before the queries are run: a customer who has just registered but has not booked anything yet, and a newly launched service that nobody has booked yet. They make the later join queries more interesting.

```
SQL> INSERT INTO Customer
  2  VALUES ('CU-1005', 'Divya', 'Menon', 'divya.menon@nailverse.com', 9123456780,
  3  TO_DATE('2026-10-01', 'YYYY-MM-DD'));

1 row created.

SQL> INSERT INTO Service
  2  VALUES ('SRV010', 'Gel Extension', 'Cat0004', 1699, 100, 4);

1 row created.
```

1. Perform Basic SQL Queries

Concept:

The SQL SELECT command is used to read data from a table without changing it.

1. Display all customer details.

```
SQL> SELECT * FROM Customer;

CUSTOMER_ID          FIRST_NAME           LAST_NAME
-------------------- -------------------- --------------------
EMAIL                                PHONE CREATED_A
---------------------------- ---------- ---------
CU-1001              MEERA                IYER
meeraiyer@nailverse.com        9876543210 14-FEB-23

CU-1002              KAVYA                RAO
kavya.rao@gmail.com            8765432109 23-SEP-24

CU-1003              ANANYA               SURESH
ananya.suresh@yahoo.com        7654321890 12-DEC-24

CUSTOMER_ID          FIRST_NAME           LAST_NAME
-------------------- -------------------- --------------------
EMAIL                                PHONE CREATED_A
---------------------------- ---------- ---------
CU-1004              PRIYA                NAIR
priya.nair@gmail.com           9870654312 24-MAY-22

------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV004  CHROME NAIL ART                                    CAT004         999
              45             25

SRV005  SPA PEDICURE                                       CAT005         799
              90             10

SRV006  Chrome Nail Art                                    CAT003        1299
              80

6 rows selected.
```

3. Retrieve only the service names and their prices.

```
SQL> SELECT Service_Name, Price FROM Service;

SERVICE_NAME                                          PRICE
-------------------------------------------------- ----------
CLASSIC MAINCURE                                         499
CLASSIC PEDICURE                                         650
NAIL EXTENSIONS                                          459
CHROME NAIL ART                                          999
SPA PEDICURE                                             799
Chrome Nail Art                                         1299

6 rows selected.
```

4. Display all appointments booked by customers.

```
SQL> sELECT * from Appointment;

APPOINT CUSTOMER_ID          APPOINTME TOTAL_AMOUNT APPOINTMENT_STATUS
------- -------------------- --------- ------------ --------------------
A001    CU-1001              24-OCT-26          999 COMPLETED

PAY0009 A009    01-FEB-26 Cash            FAILED                   1100
PAY0010 A010    02-APR-26 UPI             COMPLETED                2500

10 rows selected.
```

2.

Apply Filtering Conditions Using WHERE

1. Find the services priced above ₹1000.

```
SQL> SELECT * FROM Service WHERE Price >1000;

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV006  Chrome Nail Art                                    CAT003        1299
              80
```

2.

Display the services that have more than 5 free slots.

```
SQL> SELECT * FROM service WHERE Slot_Available > 5;

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV001  CLASSIC MAINCURE                                   CAT001         499
              50              20

SRV002  CLASSIC PEDICURE                                   CAT002         650
              45              20

SRV003  NAIL EXTENSIONS                                    CAT003         459
              50              15

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV004  CHROME NAIL ART                                    CAT004         999
              45              25

SRV005  SPA PEDICURE                                       CAT005         799
              90              10
```

3.

Display the completed appointments.

```
SQL> SELECT * FROM Appointment WHERE Appointment_Status = 'COMPLETED';

APPOINT CUSTOMER_ID          APPOINTME TOTAL_AMOUNT APPOINTMENT_STATUS
------- -------------------- --------- ------------ --------------------
A001    CU-1001              24-OCT-26          999 COMPLETED
A004    CU-1004              27-DEC-26          800 COMPLETED
A010    CU-1010              02-APR-26         2500 COMPLETED
A007    CU-1007              30-MAY-26         1800 COMPLETED
```

4. Find the services whose average rating is above 4.

```
SQL> SELECT s.Service_Name,
  2         ROUND(AVG(r.Rating), 2) AS Average_Rating
  3  FROM Service s
  4  JOIN Review r
  5      ON s.Service_ID = r.Service_ID
  6  GROUP BY s.Service_ID, s.Service_Name
  7  HAVING AVG(r.Rating) > 4
  8  ORDER BY Average_Rating DESC, s.Service_Name;

SERVICE_NAME                                       AVERAGE_RATING
-------------------------------------------------- --------------
CHROME NAIL ART                                                 5
CLASSIC PEDICURE                                                5
NAIL EXTENSIONS                                              4.25
```

3. Sort Data Using ORDER BY

Tasks:

1. Display the services from the lowest to the highest price.

```
SQL> SELECT * FROM Service ORDER BY Price;

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV003  NAIL EXTENSIONS                                    CAT003         459
              50             15

SRV001  CLASSIC MAINCURE                                   CAT001         499
              50             20

SRV002  CLASSIC PEDICURE                                   CAT002         650
              45             20

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV005  SPA PEDICURE                                       CAT005         799
              90             10

A002    CU-1002              25-JAN-26         1200 PENDING

10 rows selected.
```

4. Retrieve Unique Values Using DISTINCT

Tasks:

1. Display the unique service categories that have services.

```
SQL> SELECT DISTINCT c.Category_Name AS Category
  2  FROM Category c
  3  JOiN Service s ON c.Category_ID = s.Category_ID
  4  ORDER BY Category;

CATEGORY
------------------------------
MANICURE
NAIL ART
NAIL EXTENSIONS
PEDICURE
SPA CARE
```

2. Find the different payment methods used by customers.

```
SQL> SELECT DISTINCT Payment_Mode
  2  FROM Payment
  3  ORDER BY Payment_Mode;

PAYMENT_MODE
---------------
Cash
Credit Card
Debit Card
Net Banking
UPI
```

5. Search Services Based on Conditions

Write SQL queries to:

1. Find services within a price range (between ₹800 and ₹1500).

```
SQL> SELECT * FROM Service WHERE Price BETWEEN 800 AND 1500
  2  ORDER BY Price;

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV004  CHROME NAIL ART                                    CAT004         999
              45             25

SRV006  Chrome Nail Art                                    CAT003        1299
              80
```

2. Display the services that belong to one category (Nail Art, Cat0003).

```
SQL> SELECT * FROM Service WHERE Price BETWEEN 800 AND 1500
  2  ORDER BY Price;

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV004  CHROME NAIL ART                                    CAT004         999
              45             25

SRV006  Chrome Nail Art                                    CAT003        1299
              80

SQL> SELECT * FROM Service WHERE Category_ID = 'CAT003';

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV003  NAIL EXTENSIONS                                    CAT003         459
              50             15

SRV006  Chrome Nail Art                                    CAT003        1299
              80
```

3. Find the products currently available in inventory.

```
SQL> UPDATE Inventory
  2  SET Stock_Status = 'Available'
  3  WHERE Stock_Quantity > 0;

4 rows updated.
```

4. Search a service using its name.

```
SQL> SELECT * FROM Service WHERE Service_Name = 'SPA PEDICURE';

SERVICE SERVICE_NAME                                       CATEGOR      PRICE
------- -------------------------------------------------- ------- ----------
DURATION_MINUTES SLOT_AVAILABLE
---------------- --------------
SRV005  SPA PEDICURE                                       CAT005         799
              90             10
```

5. Find the low-stock products (stock below 4).

```
SQL> SELECT * FROM Inventory WHERE Stock_Quantity < 4;

INVENTO PRODUCT SUPPLIE STOCK_QUANTITY STOCK_STATU LAST_UPDA
------- ------- ------- -------------- ----------- ---------
INV0003 P100002 S00002               2 Available   26-FEB-14
```

6. Retrieve Customer and Service Information

Tasks:

1. Display customer details along with their appointments.

```
SQL>
SQL> SELECT c.Customer_ID,
  2         c.First_Name || ' ' || c.Last_Name AS Customer_Name,
  3         a.Appointment_ID,
  4         a.Appointment_Date,
  5         a.Total_Amount,
